

DLW delifol

DLW delifol

DLW delifol

je tkaninou vyztužená fólie PVC-P, kde nedochází ke hnití a zvětrávání. Extrémně oděruvzdorná fólie vyztužená vysoce pevnou tkaninou TREVIRA, umožňuje dosáhnout velké rychlosti pokládání s minimálními výdaji. DLW delifol zajišťuje samozřejmě také bezpečnost proti uklouznutí a to typem DLW NGP, která má lisovaný strukturovaný povrch vhodný zejména pro použití na schody. DLW delifol je antibakteriálně ošetřena a zamezuje tedy usazování bakterií a plísní. Homogenní povrch zamezuje růstu řas a usazování nečistot.

DLW delifol

is a PVC-P reinforced with fabric where putrescence and disintegration doesn't occur. Reinforcement with highly durable TREVIRA fabric makes the liner extremely scrape-resistant and enables fast installation with minimal expenses. Pressed texturized anti-slip surface of DLW NGP is recommended to use especially on steps. DLW delifol is antibacterially treated and thus prevents germs and decay formation. Homogenous surface doesn't allow algae growth and impurity deposits.
