Vodní atrakce – chrliče Water attraction – cascade showers

Chrliče a vodní clony

Bazénový vodní chrlič je nejen zajímavou dekorací bazénu, ale také zajišťuje přirozené prokysličení vody. Vodopád tvořený padající vodou z chrliče lze využít pro jemnou masáž krku i zad, nebo pro vytvoření zvukové kulisy v relaxačním prostředí.

Chrliče jsou vyráběny v nerezovém provedení AISI316 a jsou ručně leštěné za účelem vysoké kvality lesku.

Cascade showers and water apertures

The pool water cascade shower is not only an interesting decoration of the pool but also ensures the natural oxygenation of the water.

The waterfall formed by the falling water from the cascade shower can be used for a gentle massage of the neck and back, or to create a soundstage in a relaxing environment.

The cascade showers are made in stainless steel AISI316 and are manually polished for high-quality gloss.
