## CLEANING

### > 3 TECHNOLOGIES FOR SWIMMING POOL CLEANING

To clean a pool as well as possible, multiple parameters are considered in **the choice of cleaning equipment**: shape and lining of the pool, standard of cleaning, volume to be covered, etc.

**High technology Zodiac® cleaners** match the different features of a pool, the cleaning time and every budget.

**3 types of technologies** are currently available:  
electric cleaning, hydraulic cleaning and pressure cleaning.

#### > ZODIAC® ELECTRIC ROBOTIC CLEANERS: A HIGH-PERFORMANCE, STAND-ALONE SYSTEM

**Separate from the filtration system** and simply connected to the mains power, they are Plug&Play and **stand-alone equipment**.

With no action required and **programmable** (cleaning time, area to be covered, etc.), they reach every corner of the pool, climb the walls, clean the water line and collect impurities in their own filter basket.

There are different models for all types of pools.

#### > ZODIAC® HYDRAULIC ROBOTIC CLEANERS: A SIMPLE AND AFFORDABLE SOLUTION

Hydraulic robotic cleaners can be easily installed in the pool filtration system. In fact, they work on the energy produced by your pump.

Vacuum cleaners capture debris by suction and accumulate it in the pump pre-filter.

**More affordable** than electric cleaners, hydraulic cleaners are connected to a pool vacuum point or a skimmer and are **particularly suitable for the smallest pools** (with a flat floor or gentle slope and above-ground pools).

#### > AUTOMATIC POLARIS® CLEANERS: THE POWER OF A HIGH-PRESSURE CLEAN

These cleaners **use the swimming pool's filtration pump as a power source** for even more efficient and precise high-pressure cleaning.

Instead of being connected to the suction, pressure cleaners are connected to the pool water return, using the vacuum point converted to discharge.

In this way, the pool skimmers remain active and maintain full surface filtration capacity.

Pressure cleaners work with a booster pump and have a canister that collects debris sucked in, preventing the pump pre-filter from becoming blocked.

To optimise the efficiency of these accessories, it is essential to **ensure they are compatible with the pool lining**, filtration equipment, environment, etc.

## > ELECTRIC ROBOT CLEANERS

### A stand-alone and efficient solution

The electric robots combine **the best of Zodiac® technology**.

Thanks to the embedded cyclonic suction, a patented Zodiac® technology, **the cleaning performance is maintained throughout the cleaning cycle**. They even capture the finest debris without filter clogging.

Separate from the filtration system, these Plug&Play devices trap debris in their own filter basket, making them stand-alone.

#### > TORNAX PRO, EFFICIENCY PURE & SIMPLE

The Tornax robotic cleaner guarantees **efficient cleaning** of your pool, completely autonomously, thanks to its smart movement and its rotating brush, which removes debris before collecting it. Tornax is the **lightest** (5.5 kg) of all the Zodiac® robotic cleaners.

It is feather-light, meaning it is quick, easy and **effortless** to operate. Tornax is designed not only to be easy to use but also easy to maintain, as the filter can be accessed from the top so it can be rinsed without touching the debris.

#### > CYCLONX™ PRO, CONCENTRATED TECHNOLOGY

Robotic cleaners in the CyclonX™ PRO range provide optimum cleaning of the pool, thanks to several pre-programmed cycles, a **Deep Clean** cycle to clean the pool floor and a one-hour **Quick Clean** programme. Thanks to their large capacity filter (up to 3.7 L) and their wide suction inlets, all debris is collected. The filter can be easily cleaned using the **Push'n'Go™** function, a patented Zodiac® innovation that helps raise the filter basket handle with the push of a button.

#### > VOYAGER™, HIGH POWER AGILITY

With its patented cyclonic suction, VOYAGER™ range adapts to all pools and all coatings. Thanks to **embedded sensors** such as gyroscope or accelerometer, the robotic cleaners offers **excellent coverage of each pool**. Also remotely accessible via the iAqualink™ application. Its helical brushes, its **double filtration canister** (60 and 150 microns) and its large suction inlet of 23cm allow a thorough cleaning of all areas of the pool.

#### > VORTEX™ PRO 4WD, ULTIMATE POWER IN A 4 X 4 VERSION

Robotic cleaners from the Vortex™ PRO 4WD range are equipped with Zodiac® patented **extra-powerful and long-lasting suction**. Equipped with **4-wheel drive**, these robotic cleaners are truly all-terrain: they adapt to all kinds of surfaces, perfectly grip the walls and get over obstacles more easily. Most of Vortex™ PRO 4WD robotic cleaners also come with **Lift System** technology, so they are lighter when being removed from water (20% less effort).

#### > ALPHA iQ™, ULTRA-EFFICIENCY COMBINED WITH INTELLIGENCE

With its Sensor Nav System™, the ALPHA iQ™ range identifies the configuration of your pool **to optimise movements** and cleaning time. The patented cyclone suction guarantees **extremely powerful and long-lasting suction**. Thanks to its patented **Lift System**, ALPHA iQ™ is lighter when removing it from the water. Monitor cleaning progress at any time through the **intuitive interface** of the iAqualink™ application. ALPHA iQ™ is **upgradeable** thanks to possible optimisations and automatic remote updates.

## CLEANING

### CYCLONIC SUCTION

Patented technology for powerful cleaning

#### > HOW DOES IT WORK?

Thanks to its unique design, Vortex cleaners feature **Cyclonic Suction** : the flow is **keeping debris in suspension inside the filter** and allows a longer lasting suction while **limiting the clogging**.

Robotic cleaners equipped with cyclonic suction:  
**RV 5300, RV 5380, RV 5600, RA 6300 iQ, RA 6500 iQ and RA 6700 iQ**

### LIFT SYSTEM

Patented innovation for easier removal from the water

#### > 20% LESS EFFORT

The robotic cleaner positions itself on the chosen wall and cleans right up to the water line. Then a powerful waterjet propels it from the water: **which means you can remove the robot from the water with just 20% of the effort**.

Robotic cleaners equipped with Lift System:  
**RV 5380, RV 5600, RA 6300 iQ, RA 6500 iQ and RA 6700 iQ.**

### SENSOR NAV SYSTEM™

Smart navigation system for efficient and customized cleaning

#### > PERSONALISED CLEANING OF EACH POOL

**Sensor Nav System™** gathers different embedded features which enable the **robotic cleaners to learn all about each pool and to adapt its cleaning** in the smartest way.

- Recognition and analysis of the pool dimensions and shape to provide an optimized navigation pattern and cleaning time for each pool.
- Focusing on common dirty areas such as bottom of the walls or flat areas of the pool

Robotic cleaners equipped with Smart Nav system™: **RA 6300 iQ, RA 6500 iQ and RA 6700 iQ**

## CLEANING

### SWIVEL

#### Avoid cable tangling

##### > HOW DOES IT WORK?

Automatic swivel system prevents cable tangling during cleaner operation in the pool. **The cleaner efficiency is optimized and the cable storage is easier.**

Robotic cleaners equipped with Swivel: **RV 5380, RV 5600, RA 6300 iQ, RA 6500 iQ and RA 6700 iQ**

### 4-WHEEL DRIVE (4WD)

#### Effective cleaning of all surfaces

##### > GETTING OVER OBSTACLES MORE EASILY

Equipped with **4-wheel drive**, robots from the **Vortex™ PRO 4WD** and **ALPHA iQ™** ranges adapt to all situations.

##### > OPTIMAL COVERAGE AND PERFECT GRIP

Thanks to their excellent grip, robots from the **Vortex™ PRO 4WD** and **ALPHA iQ™** ranges get into the tiniest corners of the pool and clean **all kinds of surface**. The robots ensure **the pool is cleaned perfectly**.

Robotic cleaners equipped with 4 Wheel-drive:  
**RV 5300, RV 5380, RV 5600, RA 6300 iQ, RA 6500 iQ and RA 6700iQ**

### DUAL STAGE FILTRATION

#### Finer filtration and long lasting suction

##### > 2 FILTERS FOR LONG LASTING SUCTION AND FINER DEBRIS PICK UP

These 2 combined filters offer a larger mesh surface than a standard filter which allows to postpone the clogging effects. This unique design also allows the ability to use the larger mesh filter alone, which can be very useful at the beginning of the season.

##### > HOW DOES IT WORK?

2 imbricated filters : the dirty water flows through a coarse layer first (150µ) and a finer one after (60µ). The coarse filter will retain the larger debris and the finer one will then allow a finer filtration.

Robotic cleaners equipped with Dual-stage filtration: **RE 4400 iQ**

- The ideal hose length for the pool equals the greatest distance that the cleaner can cover in the pool from the connection point (skimmer) to the farthest corner of the pool, plus a 1 metre section.
- For optimal installation, perform a flow test and adjust the flow rate using an adjusting valve.

## The high pressure cleaner

The cleaner sucks in debris using a physical principle called '**Venturi effect**', which is produced inside the machine and **converts the incoming water into a powerful suction current**.

This characteristic provides maximum efficiency in the minimum time.

### EQUIPMENT NEEDED

- The pipes of the vacuum point must be made of RIGID 16 bar PVC and not flexible material
- Booster, minimum 1 HP coupled to filtration

For optimum operation, advise your customers to equip their pools with an electrical programming box and a Polaris® booster. This guarantees complete compatibility and ideal suction power.

- Minimum operating pressure 1.8 bar

### STANDARD INSTALLATION

- 1 Water is sucked by the pump through the skimmers and the floor drain.
- 2 The water is sent to the filter to be cleaned.
- 3 The water is returned clean to the swimming pool through the return discharges.
- 4 A detour is created on this pipework to feed the booster.
- 5 Polaris® pressure cleaners are connected to the vacuum point converted into return discharge.
- 6 The Venturi effect generated by the jets converts the incoming water into a powerful suction current and enables the cleaner to move.
- 7 The length of the pipe must be equal to the distance between the return pipe (5) and the furthest point (7).

### INSTALLATION OF THE PIPE
